

Bachelor of Arts

Psychology

Student Learning Outcomes

Student Learning Outcome 1:

Demonstrate familiarity with major concepts in psychology: Specifically, use theories to predict and explain mental processes.

Student Learning Outcome 2:

Demonstrate understanding of basic research methods used in psychology: Specifically, evaluate the validity of conclusions presented in research reports.

Student Learning Outcome 3:

Demonstrate critical and creative thinking, skeptical inquiry, and, when possible, utilize the scientific approach to solve problems related to behavior and mental processes: Specifically, use scientific principles and evidence to test/resolve claims.

Student Learning Outcome 4:

Demonstrate an understanding of ethics in psychology: Specifically, recognize the need for ethical behavior in all aspects of the science and practice of psychology.
