Thank you for choosing the Polycom® SoundStation IP 7000, a conference telephone that provides high quality audio conferencing over an IP network.

These items are included in your SoundStation IP 7000 package. If you are missing any items, contact your SoundStation IP 7000 reseller.

### Parts List

- SoundStation IP 7000
- Quick Start Guide
- Network Cable

### Optional Accessories

- Power Interface Cable
- Power Adapter
  (Not shown: Country-Specific Power Cable)
- External Microphones
Installation

To install the SoundStation IP 7000, plug one end of the network cable into the network port on the bottom of the SoundStation IP 7000 console, and plug the other end of the network cable into your data port with PoE.

External Microphone

Connect external microphones (optional accessory), as shown below.
After it has been connected to the network, the SoundStation IP 7000 automatically powers up via Power over Ethernet (PoE), and begins a process of establishing itself on the network. When this is complete, the Idle screen is displayed (as shown on the right).

For more information, refer to the SoundStation IP 7000 User Guide, available online at: http://support.polycom.com/voice

SOFTWARE SUPPORT. Polycom will provide support for software running on the product in accordance with the terms of the warranty, service contract or Polycom Authorized Reseller Agreement. Polycom reserves the right to charge a fee for any support beyond the terms of the warranty, service contract or the Polycom Authorized Reseller Agreement.

SAFETY AND REGULATORY INFORMATION. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and the receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

Lines Not Provided.
