Submitting Final Grades

All final grades are due Monday, December 15 at noon. It is critical that instructors submit final grades on time. Essential end-of-term processing, including academic status, degree certification, and financial aid review, cannot be completed until *all* final grades are submitted.

Winter 2026 Intercession Courses (December 29 – January 10)

For courses offered during this session, go to [Class Schedule](#). Select Winter 2026; Advanced Search; in *Part of Term* field, type *Winter Intercession* and select that option. Then select *Search*.

Registering for Algebra Modules: MTH 1020, MTH 1030, MTH 1040

Students must add **all three modules (MTH 1020 → MTH 1030 → MTH 1040)** in order so they appear as pending in their registration, then hit Submit. In the Class Schedule, they should **expand the “Meeting Times” column** to view each module’s start/end dates and any on-campus final exam requirements. Students should typically choose the **same section number** (O1, OL1, etc.) for all modules and confirm that **all sections are open**. They cannot take **J1 or M sections** unless they are only completing a make-up module. Go to ~6:20 here: [Video: How To...Navigate the Class Schedule and Solve Common Registration Errors](#)

Students who only need MTH 1040 Algebra C heading into Winter 2026, can choose MTH 1040-J1 (Intercession) or MTH 1040-M1 (starts Jan 12th). They will need to contact C. Rimle (rimlec@udmercy.edu) or E. Roberts-Kirchhoff (robkires@udmercy.edu) for an override.

Most online/asynchronous MTH modules are now **hybrid**—coursework is online, but the **final exam is on campus**. Students should **expand the “Meeting Times” column** to see the exact exam date/time.

Example (Winter 2026, MTH 1020-M1):

Online asynchronous 2/16–3/28; **on-campus only** Thursday 3/26 at 8:30 a.m. (Engineering 223)

S M T W T F S 08:30 AM - 09:45 AM Type: Class Building: Engineering Room: 223 Start Date: 03/26/2026 End Date: 03/26/2026
S M T W T F S - Type: Online Course Building: Online Room: ONLINE Start Date: 02/16/2026 End Date: 03/28/2026

Students Leaving the University

If a student plans to leave the University, they should complete the [Total Withdrawal form](#) and submit it to the Registrar after getting a signature from their Dean’s office. This form provides important information about students who do not complete their degree at UDM.

Incomplete “I” Grades

An Incomplete is appropriate when a student has finished the majority of coursework but, for a serious reason, cannot complete the remaining requirements. It should *not* be used when a student simply stops attending. While students are expected to request an Incomplete, they may not always know this option exists, so faculty may reach out when appropriate (e.g., a student misses the final due to an emergency). If an Incomplete is approved, the student and instructor must complete an [“I” Grade Petition](#) outlining the remaining work and deadlines. For undergraduates, any incomplete work not finished within **eight weeks** after the semester ends automatically converts to I/F. [Extensions](#) may be granted by the instructor and the student’s Dean but cannot exceed **one year** from the original “I” grade.

December Graduates

December 2025 graduates will receive diplomas by the end of January and are invited to join the **May 9, 2026 Commencement** with Fall 2025, Winter 2026, and Summer 2026 graduates. The Commencement RSVP will open this spring on the [commencement website](#). Students planning to graduate now through August 2026 should apply for graduation through their **Student Profile** on my.udmercy.edu.
