## International Baccalaureate (IB) Transfer Guide

The International Baccalaureate (IB) Organization's Diploma Program enables students who have pursued collegelevel studies in high school to receive college credit based on their performance on IB examinations. Students are expected to take IB courses from a secondary educational institution accredited by the IB Organization. Students do not need to complete the IB Diploma to receive credit.

Minimum score for credit: 4 (unless otherwise noted) on any Higher Level (HL) IB examination.
Equivalencies: Below is a list of the subject areas for IB exams with specific information about course equivalencies (where they exist), scores needed for credit, and the number of credits awarded. Where a specific UDM course is not listed, IB scores generate elective credit. Depending upon a student's program, the credits awarded from IB may or may not fulfill degree requirements. HL subjects not listed can be reviewed for potential credit. *New Core effective for new students entering Fall 2017 or later.

Maximum Credit Award through Examination - A maximum of 30 credits may be earned through a combination of IB, AP, CLEP and DANTES examinations. A student may not receive both AP and IB credit for the same course.
