Master of Architecture

Career Opportunities
The Master of Architecture degree is accredited by the National Architectural Accreditation Board. With its strong focus on both the theory and practice of design, it is the recommended degree for students wishing to become practicing architects, since an accredited degree is a requirement for licensure.

Why Detroit Mercy?

- We are internationally known for our focus on urban architectural issues and provide a global perspective. We have two signature study abroad programs - a full exchange program with the Technical University of Warsaw, Poland, and a summer program at our own private facility in Volterra, Italy.

- We have an award winning architecture firm embedded right in the school – the Detroit Collaborative Design Center (DCDC). Detroit Mercy students learn to collaborate with clients while participating in the resurgence of Detroit. We have worked with over 100 nonprofit organizations and community groups.

- Students start the design studio their very first semester and have access to the latest design and presentation technology, and receiving personal attention in a supportive, student-centered environment with exceptional access to our faculty.

- Our curriculum is built around four central pillars: public interest design, co-operative education, study abroad, and hands-on lab and shop work.

Program Requirements
For a complete list of degree requirements, please visit the M.ARCH section of the online catalog at http://www.udmercy.edu/academics/catalog/
